Thank you! I very, very much appreciate the newsletter. It's been a great help with it's statistical information and showing others that international do look at problems and is working to address them! Pass on my regards to the hardworking folks!

Any thoughts on having another Paris forum in the new year? This year, I would very, very much like to attend. If it could be in March, much better for me, as our National Federation has it's Annual General Meeting some time in February.

Cheers, Monika
